

What institutions deal with the issue of occupational risk assessment?

This issue is addressed in a special way, in the form of a European campaign for the assessment of occupational risk, the EU European Agency for Safety and Health at Work, and in Poland the State Labor Inspectorate and the Central Institute for Labor Protection - National Research Institute. For employers, this means easy access to new, simple, practical and “inspirational” support materials, such as transparent risk assessment guides or easy to use checklists to identify risks.
